DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: the phrase “developed on three Cartesian axis” in line 4 is incorrect. Examiner contends that a Cartesian coordinate system has three *axes* (the plural of *axis*)—the x, the y, and the z. Is Applicant saying that each branch has three dimensions? Perhaps, Applicant should claim, “each branch developed on a Cartesian coordinate system”? Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 180,430 to Lambert. Lambert discloses the “clothes-pin” (as shown in Fig. 2) capable of use as a surgical forceps. Applicant is directed to the attached, Attachment #1. Central elastic loop “a” is shown in yellow. First rectilinear section “b” is shown in orange. Second section “c,d,e” is shown in light green. This second section has a groove at “d” in Attachment #1, which is an arcuate bend. The second section “c,d,e” makes a 90 degree joint with ending section “f,g”, which is shown in dark green in Attachment #1. At the end of ending section “f,g” is an end “h”, which slightly bends towards central loop “a”. The end is shown in pink.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. *Applicant should be wary of amending the claims and having the claims still read on one of the following:*

U.S. Patent No. 26,975 to Evans

U.S. Patent No. 1,058,257 to Perry et al.

U.S. Patent No. 1,253,468 to Cockrill

U.S. Patent No. 1,380,534 to Dalton

U.S. Patent No. 1,564,323 to Chamandy

U.S. Patent No. 878,727 to Harris et al.

U.S. Patent No. 2,810,176 to Abdel-Rahman K. Gaafar

U.S. Patent No. 356,665 to Seymour

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is

Art Unit: 3731

mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
